

REVIEW

on the educational and scientific program "Social work" (2021) training of applicants for the third (educational and scientific) level of higher education branches of knowledge 23 Social work, specialties 231 Social work at Pavlo Tychyna Uman State Pedagogical University

Educational and scientific program of training doctors of philosophy in the specialty 231 Social work is developed in accordance with modern requirements, taking into account the latest trends in reforming and modernizing higher education in the field of social work.

The peer-reviewed educational and scientific program implements a competency-based approach to the educational process, developed and updated (2021) in consultation with scientists, practitioners, potential employers, PhD graduates, graduates who have confirmed the need to train scientists majoring in 231 Social work.

The structure and content of the peer-reviewed document meets the requirements for the development of educational programs. The educational and scientific program "Social Work" for the training of doctors of philosophy focuses on the amount of credits required to obtain the third (educational and scientific) level of higher education; list of competencies of the graduate; normative content of training of applicants for higher education, which is formulated in terms of learning outcomes; forms of certification of applicants for higher education; requirements for the availability of an internal quality assurance system for higher education.

The program consistently reveals the theoretical and practical components of professional training of applicants for the third (educational and scientific) level of higher education industry of knowledge 23 Social work, specialty 231 Social work.

The content of the educational and scientific program takes into account the best foreign experience, so I could recommend it without hesitation.

The analysis of the educational-scientific program makes it possible to state that the program learning outcomes reflect the proposed program competencies (integral, general, professional) and are determined by the list of educational components.

Thus, there is reason to believe that the educational and scientific program "Social Work" training of applicants for the third (educational and scientific) level of higher education in the specialty 231 Social Work at Uman State Pedagogical University named after Pavel Tychyna is relevant, meets current requirements for educational programs, allows to form competencies that are necessary for the successful solution of scientific problems in the field of social work, and can be recommended for implementation in the educational process.
